

**WP01-T****Sensor Node**

Key Features

- WP01 Wireless Sensor node
- 316 SS Temperature thermocouple and matching well
- Mesh Network5 connectivity with long range mesh feature
- 3-5 year battery
- Easy installation
- Simple connectivity via the LevelCon App
- Communicates directly with any LevelCon Gateway

Specifications

Sensing Technology	-	Temp Probe & Well
Operating Voltage	-	3.3v
Current Consumption	-	<5mA
Temperature Range	-	300 DF Max
Output Signal	-	I2C
Programmable Units	-	Celsius/Fahrenheit
Accuracy	-	0.5% full scale
Housing	-	316 SSL
Batteries	-	2x AA L91
Process Connection	-	½ " NPT
Chirp Frequency	-	3 seconds

Key Applications

- Liquid Temperatures
- Vessel Temperatures
- Flow Temperatures
- Wireless Communication
- Multi Temperature point deployment
